

Tyler Walters

Director of Platform Architecture

503-309-3201
Portland, OR

resume@tylerwalts.com

Engineering leader with 20+ years designing, building and operating large-scale cloud software and data platforms. A hands-on architect and leader who has built teams from scratch, transformed organizations and implemented delivery systems for disciplined engineering results. Currently driving AI adoption and integration into a product platform for a digital health SaaS company.

Claritas Rx • Director of Platform Architecture • Portland, OR

2024 → Present • Digital health SaaS company building the Ascend platform for specialty biopharmaceutical data intelligence. Progressed from Principal Architect to Director of Data Platform Engineering to Director of Platform Architecture, reporting directly to the CTO.

- Director of Platform Architecture (2026–Present): Own technical strategy and roadmap for Ascend SaaS platform. Led AI adoption: deployed autonomous SDLC agents, established usage policies and guardrails, built workflow automations. Govern company AI stack with HIPAA/SOC2 compliance.
- Director of Data Platform Engineering (Nov 2024–2026): Led 16-person team. Cut hire-to-first-delivery from 2 months to 3 days with automated provisioning, sandboxes and tooling. Scaled Data Ingest from 9 to 36 biopharma customers, 380 data partners and 1.1M data sets. Launched first 3 SaaS customers on Ascend 2.0.
- Principal Architect (Jan–Nov 2024): Transformed legacy data services to SaaS product model. Launched Self Service app and Ascend 2.0 web app. Built CI/CD pipelines, AWS Organizations with Control Tower, cross-account networking and HIPAA/SOC2 data tagging. Migrated data transformation to AWS Glue and PySpark ETL.

Master of Business Administration

2004 • Oregon State University
• MBA Association Treasurer

Bachelor of Computer Science

2002 • Oregon State University
• Linux User Group VP

Prior Experience

Roar Social • Backend Software Architect • Los Angeles, CA (Remote)

2022 → 2024 • Social network gamifying charitable giving. Led architecture design and backend implementation with a team of 25 engineers. Transformed a POC demo app to a secure, scalable, production-ready system in 9 months through the full SDLC.

- Load tested content delivery APIs at 100K TPS at <50ms average latency.
- Built event-driven personalized feed generation, content discovery APIs, donation flow and administration system.
- Solved Lambda cold-start performance by migrating key services to a containerized NestJS service deployed to AWS Fargate.
- Led operational excellence program: dashboards, runbooks and auto-generated ticketing on metric anomalies and log errors.

Amazon • Cloud Application Architect • Portland, OR

2018 → 2022 • Held multiple engineering roles across Amazon and AWS, building and scaling large-scale distributed systems.

- Selling Partner Services: Managed 1.6 TB of 3rd-party seller inventory data from 14 high-volume event sources. Scaled a data routing service to 340K TPS at 50ms latency using Go and ECS Fargate auto-scaling. Led modernization of 160+ data clients across 90 teams; drove 30% reduction in high-severity tickets.
- AWS Training & Certification: Defined microservices modernization roadmap for a C# monolith serving millions of students. Improved Course Search performance with OpenSearch. Scaled LMS to 50K TPS for re:Invent. Led EU cookie consent compliance across all AWS training web properties.
- AWS Professional Services: Led 3–9 month cloud-native engagements for Whole Foods Market eStore, DoorDash deployment modernization, Alexa Music Skills and Portland General Electric Landing Zone. Built voice-UI testing framework for Drive-Through Automation R&D. Certified AWS Speaker.

Nike • Tech Lead, Trial Zone • Portland, OR

2016 → 2018 • Took over an agency-created retail experience POC and built a team to secure, standardize and scale the system to 8 flagship Nike retail locations across US, Europe and China. The Trial Zone supports digitally enhanced AR running and basketball experiences tied to shoe product launches.

- Implemented CI/CD to maintain a fleet of on-site servers with Kinect sensors, video streams and game engines, supported by cloud-based monitoring and content delivery.
- Refactored Unity3D games to use configurable assets for product and venue-specific experiences.
- Automated site-specific configuration to support scaling to additional locations.

Consulting Experience

Slalom Consulting • Solution Principal • Chicago, IL

2010 → 2016 • Business and technology consulting firm. Progressed from Consultant to Solution Architect to Solution Principal. Co-founded a DevOps-focused delivery practice and led client delivery of custom and cloud-native applications for enterprise clients across industries.

- Managed a team of 9 SDE consultants; responsible for people management, career development and client delivery oversight.
- Supported pursuit and led delivery of 7 projects driving over \$8M revenue over 5 years.
- Project oversight for up to 22 developers, architectural design and technical escalations.
- Delivered Cloud and AWS Bootcamps, tech talks, conferences and hackathons.

Hitachi Consulting • Senior Consultant • Portland, OR

2006 → 2010 • Led end-to-end delivery of custom applications and data solutions for enterprise clients. Worked across Education, Retail, Manufacturing, Distribution, Finance, Healthcare, IT and Waste Management sectors using .NET, Java and MSBI stacks.

WitMatix Web Development Services • Founder • Corvallis, OR

2004 → 2006 • Started a web development and online services company and managed a team of local resources and outsourced project teams to create custom apps and e-commerce systems.

Past Client Engagements

Echo Global Logistics • Integrated an acquired stack of IT services using IaC approaches, Chef, .NET, Hyper-V, Azure, TerraForm and DataDog.

Western Governors University • Designed a Data CI pipeline for defining data as code using Liquibase (Datical), Chef, Vagrant and Jenkins.

Qlik Technologies • Lead architect and initial operations of QlikCloud.com, providing Qlik SaaS. Took an enterprise hosted service and enabled it as an on-demand SaaS in less than a year. Delivered a globally distributed, HA and auto-scaling system based on concurrent user login count using: MEAN stack for front-end; AWS, CloudFormation, Puppet for IaC; Consul, New Relic for operations; BlazeMeter, SauceLabs for automated testing.

Pepsi • Supported analysis of vending machine metrics by defining Talend, RDS and Tableau servers as code using CloudFormation on AWS.

Law Bulletin • Migrated JuraLaw legal docket management system from on-premise Oracle/Liferay/Solr/Jasper stack to AWS. Led the cloud vendor selection process and demonstrated better consistency, agility and sprint velocity using Puppet, CloudFormation & CI/CD. Implemented IaC to ensure consistent environments and add DR ability.

Walgreens • Implemented a time-sensitive data de-identification system to meet compliance deadlines and avoid disruption of reporting services. Ensured app data was scrubbed of identifying information before flowing between pharmacies.

Blue Cross Blue Shield of Michigan • Lead engineer on a new member portal for insurance members to manage accounts and claims. Scaled team to 22 developers by automating environment setup using RedHat/WebSphere/Oracle and an IaC & CI/CD approach to delivery. Used Backbone.js, Java Spring, Liquibase for MySQL/Oracle, CloudFormation and Puppet.

Providence Health & Services • Partnered with a new Director of Healthcare Intelligence to establish a system for applying BI principles, tooling and governance to operational and research data marts. Delivered the first two pilot projects analyzing bundled knee surgery packages and stroke services using MSBI and Tableau.

Standard Insurance • Introduced Microsoft BI stack (MSBI) and converted a set of underwriting reports migrated from Cognos. Automated server configuration as code and documented runbook processes. Created center of excellence to define security, governance and training plan.

Russell Investments • Created Salesforce app to assess which accounts to invest relationship management in, and a dashboard view for users.

CorVel Software • Automated the transition from Sales to Engineering by creating a form generation and workflow service to automate the onboarding of each new customer using C#.NET.

Waste Management • Upgraded, optimized, re-designed and integrated Greenopolis.com site to ThinkGreenRewards.WM.com, and added a portal interface to provide the UI for recycling kiosks. Automated environment cloning of the Drupal LAMP stack using Drush and bash.

Nike • Used an IaC approach to defining a Vendor Management workflow system using SharePoint site templates, custom C# web parts and scripts.

Microsoft • Prepared hands-on data visualization workshop examples and authored 2 Green IT white paper articles for VisioToolbox.com in preparation for a Green IT conference. Mocked out HVAC sensor data generation, harvested in MySQL and bound to Visio to visualize data center temps.

Johnstone Supply • Enhanced data-driven marketing decisions and automated price setting for retail locations. Implemented MSBI stacks and configured daily intake, processing and analysis of retail store sales, costs and inventory CSVs using SSIS, SSAS and SSRS. Developed price setting UI to support region-specific campaigns based on predictive values.

Cascade Corporation • Customized reports and tooling machine code to stamp load bearing data on forklift parts to meet new regulations.

Columbia Sportswear • Updated corporate social responsibility app that enabled inspectors to remote factory locations offline, then automatically synchronize data when they come back online. Used C#.NET and XML-based data storage.

Knowledge Learning Corporation • Created kiosk time-clock software to allow parents and teachers to check children in/out, an administration UI for compliance, performance and financial reporting using Java Struts and Oracle. Created marketing campaign effectiveness reports.

WitMatix Clients (< 2006) • LAMP/joomla sites for new and small ventures: Symmetry-SSG.com, SunRoseSheep.com, RendezvousPCs.com, RoachWear.biz, GetFlossin.com, HeadTracker.com, BerkshireTownhomes.com, MottoRX.com, ChristianQuarter.com, BuyGoodMusic.com and others.

Side Projects	Skills			
Drone Racing • Pilot 2016 → Present • Build and race drones in MultiGP league.	AI Engineering AI Coding Tools Agentic Workflow Autonomous SDLC LLM Integration AI Guardrails & Policy Compliance Auditing	Engineering Leadership Team Building SDLC Design Operational Excellence Roadmap Planning Hiring & Performance	Cloud & DevOps CI/CD Pipelines ECS / Fargate AWS CDK / Terraform AWS Organizations Control Tower Agile Delivery	Frameworks AWS Glue / ETL PySpark NestJS Event-Driven Architecture Distributed Systems
Oracle Java Puppet Module • Author 2012 → 2017 • Automates accepting the TOS, downloading and custom installing Oracle Java.	Data Platform DynamoDB Elastic/OpenSearch Document DBs Relational DBs Redis / Memcached	Languages Python TypeScript Go HTML/CSS Java/Kotlin		
Kegbot Puppet Module • Developer 2012 → 2013 • A puppet module for automating the server configuration of the kegbot system.				

Publications

Qlik Cloud Case Studies [[Link 1](#)] [[Link 2](#)] [[Link 3](#)] [[Link 4](#)]

2015 • The QlikCloud.com solution showcased by Qlik, Slalom and AWS for how the thick client software was converted to social SaaS, the rapid implementation time and its global scaling elasticity.

DrupalCon: Case Studies in Social Commerce [[Link 1](#)] [[Link 2](#)]

2010 • Co-presented on how WM used Drupal in Greenopolis.com and ThinkGreenRewards.wm.com.
